WEB DEVELOPER EXPERIENCE

EarthxHack Sponsor Challenge – 2nd Place Winner

April 2020

Team Lead/ Web Developer

- Lead a team of 3 to build a new feature within State Farm's existing application that allows users to enroll in community challenges and earn points that can be used toward monthly policy discounts.
- Wrote 100% of the code used in the project.
- Recreated State Farm mobile app and added a "Community Challenge" feature using React.
- Analyzed API documentation for geofencing to use in one of our featured challenges.
- Designed a challenge that implemented a machine learning and image recognition API.
- Successfully met project deadline and was awarded 2nd place out of 41 sponsor challenges.

Smart-Brain Project

Full Stack Developer

(Front-End)

- Incorporated knowledge of the core JavaScript language along with React, HTML5, CSS3, and Clairifai's REST API to build a face recognition app.
- Styled the app using npm package tachyons.
- Practiced version control using Git.
- Designed app as single page application allowing quick and fluid user interaction.

(Back-End)

- Built back-end for my Smart-Brain project using server-side language Node.js and Express.
- Utilized Postman to efficiently test GET and POST request server.
- Safely stored registered users information using PostgreSQL Database.
- Securely transmitted password information using npm package bcrypt to hash passwords.
- Accurately logged user image submits and displayed to the user in real time.

Robofriends Directory

Web Application Developer

- Assembled searchable directory using React.
- Efficiently managed state using Redux for "container" components.
- Connected to RoboHash API to create custom robot models for each user.

ADDITIONAL EXPERIENCE

ARC Drafthouse

November 2018 – March 2020

Bar Manager

- Organized inventory data sheets to keep accurate numbers of usage and cost.
- Trained new staff in restaurant procedures and best practices.
- Led by example during crunch time and provided support to fellow team members when needed.
- Coordinated with vendors for special events such as pint nights and corporate happy hours.
- Promoted business using graphic design tools such as Adobe Photoshop and Illustrator to create ads and content for social media.

Bancard Payment Systems

June 2017 – November 2018

Technical Support Engineer

- Responsible for installing and troubleshooting point-of-sale systems such as Clover, TouchBistro, and ShopKeep.
- Programmed Ingenico payment terminal IP addresses for deployment.
- Securely cleared used Verifone terminals of customer information for resale.
- Provided support both on-site and remote for PCI compliance.
